PRESCRIPTION DRUG LABELS: ACTIONS NEEDED TO INCREASE AWARENESS OF BEST PRACTICES FOR ACCESSIBLE LABELS FOR INDIVIDUALS WHO ARE BLIND OR VISUALLY IMPAIRED: REPORT TO CONGRESSIONAL ADDRESSEES. (PAPERBACK)

Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. About 7.4 million Americans are blind or visually impaired and may face difficulty reading prescription drug container labels. FDASIA required the U.S. Access Board to develop best practices for accessible labels and NCD to conduct an informational campaign on these best practices. FDASIA also included a provision for GAO to review pharmacies implementation of these best practices. This report examines: the extent to which pharmacies can and do provide accessible labels and implement the best practices; pharmacy challenges; and the extent to which NCD conducted its informational campaign, among others. GAO collected information from 55 stakeholders, including 4 PBMs used by large insurers; 9 of the largest chain pharmacy companies; 18 randomly selected individual retail pharmacy locations in 4 states with varying levels of visually impaired residents; and 24 others, such as state regulating bodies and advocacy and industry groups. GAO sent a web-based questionnaire to PBMs, chain pharmacy companies, and individual retail pharmacy locations. GAO also interviewed stakeholders and reviewed state regulations and documents from NCD.
