

**Hand Book of Qualitative Chemical Analysis: Selected and Arranged for
the Students of the State Agricultural College of Michigan (Classic
Reprint) (Paperback)**

Filesize: 2.12 MB

Reviews

Extensive information for ebook lovers. It typically is not going to expense too much. I discovered this book from my i and dad recommended this pdf to learn.

(Prof. Gerardo Grimes III)

HAND BOOK OF QUALITATIVE CHEMICAL ANALYSIS: SELECTED AND ARRANGED FOR THE STUDENTS OF THE STATE AGRICULTURAL COLLEGE OF MICHIGAN (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Hand Book of Qualitative Chemical Analysis: Selected and Arranged for the Students of the State Agricultural College of Michigan Many reagents exhibit the same or similar behavior with a group of chemically similar elements, and with most of the compounds of these elements; and can therefore be used to divide the elements into groups. Such reagents are called group reagents. Others serve for the further distinction of the several members of such groups, and are termed special reagents. Their selection depends upon the knowledge of the behavior of such reagents to each single element of the group, or of each of its several compounds. The number of special reagents is much greater than that of the group reagents, their nature being as various as that of the substances which come under examination. Their selection depends on the solubility or insolubility, color, or other physical or chemical properties of the new compounds to which they give rise. Certain special reagents produce reactions which are entirely characteristic of a given substance or compound. Such reagents and reactions are distinguished by being printed in small caps. It is the task of the analyst not only to establish that this or that body is present in a compound, but he is to prove that no other body is present beside those which he has actually found. Hence it is evident that he must not treat the substance under examination with reagents indiscriminately. He must follow a certain fixed order, a methodical system in the application of reagents. This systematic method consists in the employment of group reagents for the successive separation of groups of elements possessing certain common chemical properties,...
