Taylor Francis Ltd, United Kingdom, 2014. Paperback. Condition: New. 2nd Revised edition. Language: English . Brand New Book. Can a better understanding of group dynamics raise individual and team athletic performance or improve the outcomes of exercise interventions? Much human behaviour in sport and exercise settings is embedded within groups, where individuals cognitions, emotions, and behaviours influence and are influenced by other group members. Now in a fully revised, updated, and expanded second edition, *Group Dynamics in Exercise and Sport Psychology* explores the unique psychological dynamics that emerge in sport and exercise groups. It provides a clear and thorough guide to contemporary theory, research, and applied practice, covering core themes and cutting-edge topics as well as highlighting directions for future research. The book is organised into five thematic sections: Part 1: The Self in Groups Part 2: Leadership in Groups Part 3: Group Environment Part 4: Motivation in Groups Part 5: Socio-Environmental Issues in Groups This new edition includes seven completely new chapters, exploring important emerging issues such as social identity, the family, co-ordination and shared knowledge within sport teams, the group as a vehicle for facilitating individual behavior change, social support and emotion regulation, peer leadership, and cultural perspectives in relation to group dynamics. No other book on group dynamics in sport or exercise offers such a close examination of the evidence base, and therefore *Group Dynamics in Exercise and Sport Psychology* is important reading for all students, researchers, or practitioners working in sport or exercise psychology, kinesiology, sport and exercise science, sports coaching, or physical education.
