Effect of New Trailer Designs on Transit Temperatures of Selected Frozen Foods: Frozen Pies and TV Dinners (Classic Reprint) (Paperback)

By David Warren Kuenzli

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Effect of New Trailer Designs on Transit Temperatures of Selected Frozen Foods: Frozen Pies and Tv Dinners The average bottom commodity temperature in trailer B was generally lower throughout the trip than that of trailer A. This is probably due to a better distribution of chilled air and to the greater thickness of floor insulation in trailer B (6 inches as compared with 4 inches in trailer A). These two trailers represent improvements in design and construction which will help carriers to maintain frozen foods closer to desired temperature than heretofore was possible. Additional tests will be made on other latemodel equipment to determine those features of design that will help to maintain frozen foods at the recommended temperature of 0 F. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
