To get **Mathematical Problems on the First and Second Divisions of the Schedule of Subjects for the Cambridge Mathematical Tripos Examination** eBook, remember to follow the web link under and download the ebook or gain access to additional information that are relevant to MATHEMATICAL PROBLEMS ON THE FIRST AND SECOND DIVISIONS OF THE SCHEDULE OF SUBJECTS FOR THE CAMBRIDGE MATHEMATICAL TRIPOS EXAMINATION ebook.

Theclassics.us, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1878 edition. Excerpt: . that the locus of its pole is the curve whose intrinsic equation is that the radius of curvature of this curve bears to the common radius of curvature of the osculating curves at the corresponding point the ratio $(n + 1) : n(3n + 1)$. Also the area traced out by the radius vector to the pole is $\frac{1}{2}a(n + 1)^2 \sin 2\theta$. 1767. At each point of an epicycloid is drawn the equiangular spiral of closest contact: prove that the locus of the pole of this spiral will be the inverse of the epicycloid with respect to its centre; and, conversely, the curves for which this property is true are those whose intrinsic equations are $r = a(1 - \cos mf)$, $2s = a(c t - t^2)$, measuring from a cusp in each case. 170s. A curve is such that any two corresponding points of its evolute and an involute are at a constant distance: prove that the straight line joining the two points is also constant in direction. 17G9. The reciprocal polar of the evolute of a parabola with respect to the focus is a cissoid, which will be equal to the pedal with respect to the vertex when the radius of the auxiliary circle is one-fourth of the latus rectum. 1770. In any epicycloid or hypocycloid the radius of curvature is proportional to the perpendicular on the tangent from the centre of the fixed circle. 1771. The co-ordinates of a point...
