Indeed, this term itself has had large extension within recent years. Law, medicine and theology, which made the noble scope of the mediaeval Universities, no longer bound the activities of the great schools which have inherited their name and still bear their prestige transported in place and broadened in scope. Geology, geography, meteorology, astronomy, have each revealed new aspects of the worlds; biology, new reaches of life; chemistry and molecular physics have opened to us glimpses of wondrous modes of action which we scarcely dignify by calling them laws, inasmuch as they seem like generative powers; the problems of psychology are investigated on new lines, and even the traditions of history in its monu ments. Relics and languages are tried by new tests and...
