

Semantic Role Labeling

By Blossom Meghan Jessalyn

Sess Press Betascript Publishing. Taschenbuch. Condition: Neu. Neuware - Semantic role labeling is a task in natural language processing consisting of the detection of the semantic arguments associated with the predicate or verb of a sentence and their classification into their specific roles. Natural language processing (NLP) is a field of computer science and linguistics concerned with the interactions between computers and human (natural) languages; it began as a branch of artificial intelligence. In theory, natural language processing is a very attractive method of human computer interaction. Natural language understanding is sometimes referred to as an AI-complete problem because it seems to require extensive knowledge about the outside world and the ability to manipulate it. 52 pp. Englisch.

Reviews

It in a of the most popular book. It really is filled with wisdom and knowledge You may like how the article writer publish this pdf.

-- **Kellie Huels**

Unquestionably, this is actually the very best job by any article writer. I have read and that i am certain that i am going to planning to go through once again once more in the foreseeable future. I realized this publication from my i and dad advised this pdf to find out.
