Reviews

Without doubt, this is actually the best job by any publisher. It is written in basic phrases instead of difficult to understand. You will like the way the author publishes this publication.

NATURAL AND ARTIFICIAL INCUBATION AND BROODING (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Natural and Artificial Incubation and Brooding This bulletin has been prepared with the Idea of helping, If possible, those already in the poultry business, both large and small breeders, who have, perhaps, experienced some difficulty In the hatching or brooding branch of their work, and those without experience who intend starting to this branch of agriculture. The Essential of Successful Incubation. The most common cause of poor results or failure in incubation is the use of eggs of low vitality. Successful incubation begins long before the eggs are laid. The eggs must be from stock of high vitality that have never been forced; that are fed all the green food they will eat, and some form of animal food as well as grain. While fowls will sometimes lay a goodly number of eggs upon a grain diet, yet the eggs are oftentimes lacking in those food elements that the embryo requires, and they often hatch poorly, and those chicks that do hatch will be of impaired vitality, very difficult to raise. The vitality of the breeding stock, food or housing, and the range should be carefully looked after, as the neglect of any one of these factors will impair the vitality of the stock; consequently the eggs will not give good results with either incubator or hen. Vigorous Breeding Stock Necessary For Successful Incubation. The Male. Care should be exercised in the selection of the male, since his influence in the flock is so great. He should be fully matured and well developed, though not too heavy. Medium-sized male birds give good results when mated to hens of good proportions. That he be a sound...
