

## Applied Biocatalysis

Filesize: 5.07 MB

### **Reviews**

*This pdf is fantastic. It typically is not going to price too much. You will not truly feel monotony at at any time of your own time (that's what catalogs are for about if you request me).*

*(Leslie Reinger)*

## APPLIED BIOCATALYSIS

To get **Applied Biocatalysis** eBook, make sure you follow the link below and download the file or have accessibility to additional information which might be have conjunction with APPLIED BIOCATALYSIS book.

Condition: New. Publisher/Verlag: Wiley-VCH | From Fundamental Science to Industrial Applications | This reference book originates from the interdisciplinary research cooperation between academia and industry. In three distinct parts, latest results from basic research on stable enzymes are explained and brought into context with possible industrial applications. Downstream processing technology as well as biocatalytic and biotechnological production processes from global players display the enormous potential of biocatalysts. Application of "extreme" reaction conditions (i.e. unconventional, such as high temperature, pressure, and pH value) - biocatalysts are normally used within a well defined process window - leads to novel synthetic effects. Both novel enzyme systems and the synthetic routes in which they can be applied are made accessible to the reader. In addition, the complementary innovative process technology under unconventional conditions is highlighted by latest examples from biotech industry. | FERMENTATION & DOWNSTREAM PROCESSING TECHNOLOGIESProcess development tools for fermentations under extreme conditions (ProTool)Development of fully automated integrated bioprocesses in an industrial compatible pilot plant for the production of heterologous enzymes in yeastApplication of tailor made porous adsorbents in enzymatic processesIn-situ video microscopy for investigation and optimization of protein crystallization in downstream processingInnovative plasma technology for enzyme immobilizationNew membrane adsorber technology for downstream processing in enzyme productionBIOCATALYSIS & BIOTECHNOLOGICAL PRODUCTION PROZESSESBiocatalysis in high viscous mediaCOMPASITES: Computer assisted analysis of active centers in proteinsKongeneric lipases with improved catalytic activity and substrate accessibilityBiocatalytic exploitation of flavonoidsNew Bacillus expression systemsFirst SeSaM-mutagenesis kit for evolutionary biocatalyst designDevelopment of a probiotic preserving agent for industrial applicationsDevelopment of a biotechnological production process for non-natural cyclopeptides - BioPEPBiocatalytic exploitation of flavor enhancing aroma compoundsSTABLE ENZYMESEnzymatic oxidation systems food and technical applicationsPreparation of new perhydrolases: Simultaneous enhancement of specific activity of perhydrolases and reduction of hydrolysis activityNucleases and proteases exhibiting improved properties for molecular preanalyticsStable enzymes for the conversion of high...
