The book starts by explaining how XHTML differs from HTML, and why it's necessary. It then covers the 'meat' of XHTML, including syntax and document creation. Additional topics include creating tables and frames, designing pages effectively, using graphics, color, images and tools, working with stylesheets, adding multimedia and embedded objects, and the relationship between XHTML and XML. Later sections discuss the concept of XHTML modularization, which can be applied to create web content for alternative browsers including pagers, cell phones, and hand held devices. 900 pp. Englisch.
