Brand New Book ***** Print on Demand *****.Forest Power: Adventures in Ecology and Forest Management is a collection of articles from The Taos News Natural Resources Notebook column 2007 - 2012 arranged by topic with connecting text and comments, designed for use by the general public interested in learning about basic ecology principles applied to forest management. Would-be ecology and forestry students and activists will find this book helpful in deciding on further studies and in being better informed participants in society s quest for forest resource sustainability. Readers will go on a learning adventure into the dynamics of forest ecosystems, .
