

A new physical geography Volume 2

By Elisee Reclus

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 232 pages. Dimensions: 9.7in. x 7.4in. x 0.5in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1886 Excerpt: . . . this is about the proportion which is observed in Alsace. In the valley of the Rhine the quantity of rain is on an average from 22 to 22-8 inches in the year, while on the high Vosges it is from 43 to 47 inches. Alsace therefore is in this respect a resume of the entire continent. The Jura, arresting the passage of the winds which bear the vapour drawn from the ocean, forces them also to let fall their burden of moisture. By tracing a transverse line to the valley of the Saonc from the heights of s Charolais to the mountains of Jura, M. Fournet has ascertained that the annual precipitation increases tolerably regularly with the altitude; from 27-4 inches on the right bank of the Saonc it increases gradually to the parallel wall of the Jura; on the western side it becomes greater with...

Reviews

It becomes an amazing pdf that I actually have ever go through. This is for those who statte that there had not been a worth reading through. You will like how the author create this pdf.

-- Prof. Lonie Roob

Extensive manual! Its this type of great read through. This can be for all who statte there was not a worth reading. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Dr. Furman Becker V
