

Changes in the NC Hispanic/Latino Population, 1990 to 1994: With Implications for Public Health (Classic Reprint) (Paperback)

By Laureen Marie Lopez

Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Changes in the Nc Hispanic/Latino Population, 1990 to 1994: With Implications for Public Health Table 10 includes the county-level changes in the Hispanic/ Latino population since 1990 for births, students, and migrant farm workers. While there had been a 20 overall increase in Spanish migrant farm workers, there were greater increases in Hispanic births and students It is unknown whether the births were to resident or migrant women. However, it was notable that the increase in Hispanic births occurred over a four-year period. Nationally, Hispanics/ Latinos were expected to increase 27 between 1990 and 2000. North Carolina s increase in Hispanic/ Latino births had already exceeded that estimate. The student data showed the most dramatic increases for the number of Hispanic/ Latino students had more than doubled. It is likely that many of these children were residents, rather than migrants since the Spanish migrant population only increased 20 during this time. There is no certainty, however. Many may have been children of former migrants who settled out of the migrant stream. Once again, these increases were even more notable since they...
