

The Leeds Correspondent Volume 2; A Literary, Mathematical, and Philosophical Miscellany

Filesize: 8.88 MB

Reviews

Undoubtedly, this is the best work by any author. It is really simplified but shocks within the 50 % in the publication. Its been written in an extremely straightforward way and is particularly just following i finished reading this publication by which basically altered me, modify the way in my opinion.

(Vivianne Dietrich)

THE LEEDS CORRESPONDENT VOLUME 2; A LITERARY, MATHEMATICAL, AND PHILOSOPHICAL MISCELLANY

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1818 Excerpt: .circ.arc to rad. and b a sine x, and consequently when $x = OD$, y and of course the curve described by P are both = a quadrant.) Otherwise by Mr. A. Cook. While the radius OD moves into any position O-PR, suppose the point P to have moved from O to P and traced out the curve OnP. Draw Ond indefinitely near OPD; also draw Vm perp. to Od. Let the veloc. ofD: veloc. P:: m: n, put $OD = r$, arc $DD-x$, $OP = y$, nx . then the curve $OnP = Dd = x$, $mn-y$, $Yn=L$. m and by sim. tri. $Pm = Now P^2-2 + mn = Pns$; that JL: the fluents are $x = circ. arc to rad.$ r An ingenious solution mas received from Mr. Johnson. (121) By Faciuor. At the same time that a ball was let fall from the top of a tower, another was projected upward with a velocity of 100 feet per second, and it was observed that when the former arrived at the bottom, the latter was descending and at the distance of 20 feet: required the height of the tower. Solution by Mr. A. Cook. The projectile velocity upwards being 100 feet per 100 second, we shall have by the laws of gravity, $4 \times 16 = 155.44$ feet = the height ascended to by the bi before it stops, and begins to fall downward; therefore the time of the ball s arriving again within...
