Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Organic Agricultural Chemistry: The Chemistry of Plants and Animals Agricultural chemistry is a subject presenting two quite distinct lines of study. The study of soils and fertilisers, including the relation of the plant to its soil food, is almost wholly inorganic and physical. On the other hand, the study of plants and animals as living organisms is as distinctly organic and physiological, embracing the greater part of what is termed Bio-Chemistry This has led the author to prepare one part of a textbook of General Agricultural Chemistry with this distinction in view, and to designate it as Organic Agricultural Chemistry-The Chemistry of Plants and Animals. The companion volume on Inorganic Agricultural Chemistry - The Chemistry of Soils and Fertilizers - is being prepared by the author s associate. Dr. Ernest Anderson. The author believes that there is a place in our Agricultural Colleges for a course covering the work included in these two volumes with the definite aim of giving to students of practical agriculture enough general scientific instruction in chemistry to enable them to understand and correlate the broad problems of agricultural practice. The course covered by the two books has been planned to follow a course in general chemistry such as is given in the Freshman year in most colleges, and assumes a knowledge represented by such work. The present volume does not pretend in any sense to replace the more thorough study of both organic and physiological chemistry by those students preparing to be chemists or other scientific workers in agriculture. Assuming that the student has not had a special course in systematic organic chemistry, there is included, as Section I, the..
