

Josef Eul Verlag GmbH Nov 2013, 2013. Taschenbuch. Condition: Neu. Neuware - The main goal of this book is to emphasize the impact of ubiquity on scientific entrepreneurship and to promote practical ways to make scientific entrepreneurship ubiquitous within universities in order to create more startups, for economic and societal benefit. The book begins with a look at the state of research on ubiquity in humanities and information technology. First, the ubiquity of God in theology is analyzed, with a focus on the three major religions - Christianity, Islam, and Hinduism. Also, ubiquity in the field of law is investigated to examine whether and how ubiquity is described in jurisprudence and in how far it adds to the concept of ubiquity. Second, the field of IT is focused, where ubiquity occurs in the area of ubiquitous computing. The analysis of the state of research in humanities and information technology then allows the identification of certain characteristics of ubiquity. These characteristics are used as determinants to develop a model, consisting of a general ubiquitous entrepreneurship framework and a ubiquitous entrepreneurship board. This model was developed to ensure that each university can use the identified characteristics for ubiquity from theology and IT...

*Unquestionably, this is actually the greatest function by any writer. We have go through and so i am confident that i am going to gonna read through once more once again later on. I am just happy to explain how this is actually the very best book i have got go through during my individual existence and might be he greatest ebook for ever.*

-- Wilbert Connelly

*This publication is indeed gripping and intriguing. It is actually written in basic terms and not difficult to understand. I am just pleased to explain how here is the greatest publication we have read through during my own lifestyle and could be the best pdf for at any time.*
